

# BUBBLE MOBILE

## YOU'LL NEED:

- String or Yarn
- Pencil (or 3 Straws!)
- Scissors
- Glue

## GETTING STARTED

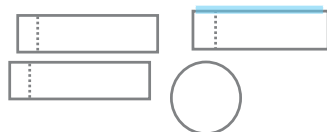

- Cut solid lines and fold dotted lines.
- Fold all pieces upward or downward along score lines.
- Glue the stars according to directions and let dry.

## INSTRUCTIONS

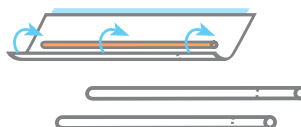

### Frame & Frame Bubble

- 1** Cut out Frame along solid grey lines. Add a long piece of tape to the printed top edge of each rectangle and place printed down so the tape doesn't stick to the table.

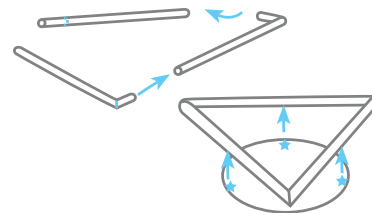

(Shortcut! You can use sticks or straws as the 3 sides of the frame and skip to Step 3)

- 2** Use a pencil to help roll the rectangle into a tube, using the tape at the end to keep it from unraveling. Remove the pencil and repeat to make 3 tubes.

- 3** Fold along dotted lines and insert each small end into the next tube to form a triangle. Glue the frame together and the circle face down to the underside

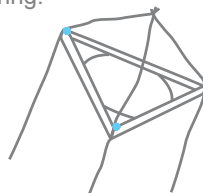

### String

- 4** Cut three pieces of string about 20 inches each. Tie them all together at one end

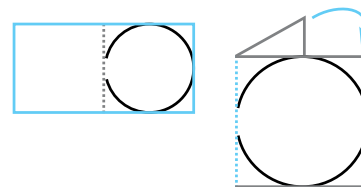

- 5** Tie the three strings an even distance to the 3 corners of the frame. The Mobile will hang from the top knot, and the Bubbles will be attached to the dangling string.

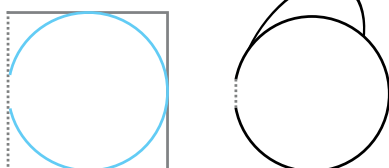

### Bubbles

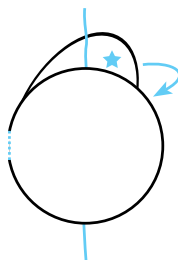

- 6** The Bubbles can be attached along the strings in whatever order you like. Cut out along outer grey lines and fold along the dotted line.

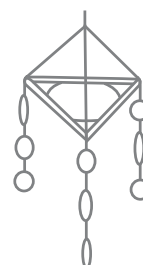

- 7** While folded in half, cut along inner black line. Be careful not to cut the dotted line. Open the fold.

- 8** Place the string in the center of the circle and glue the two pieces on either side of the string.

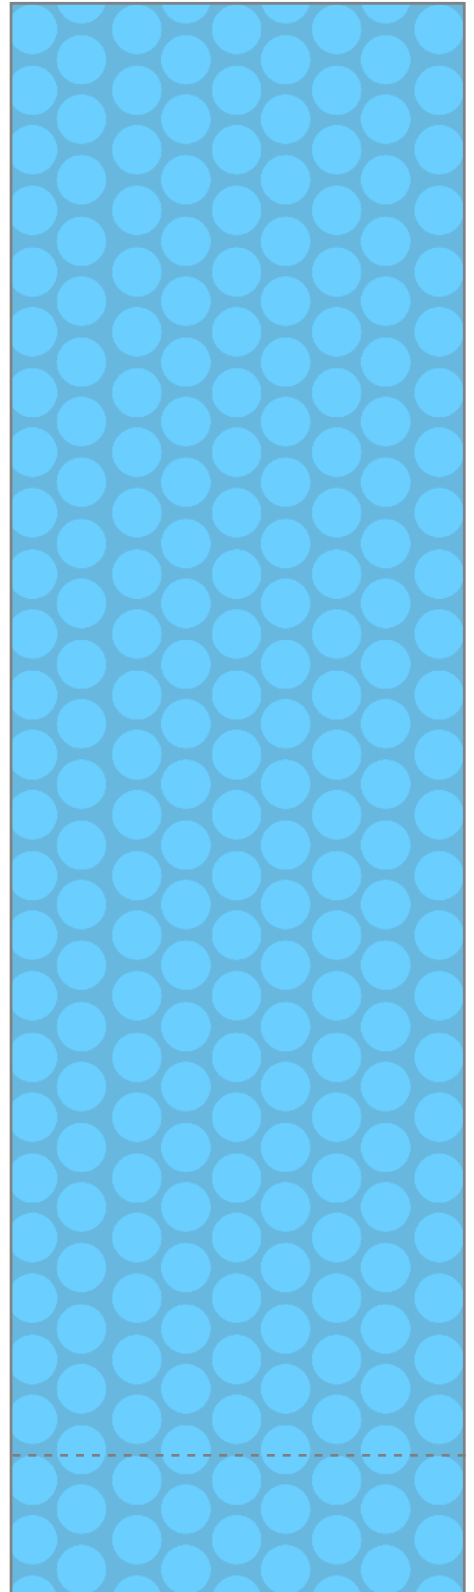

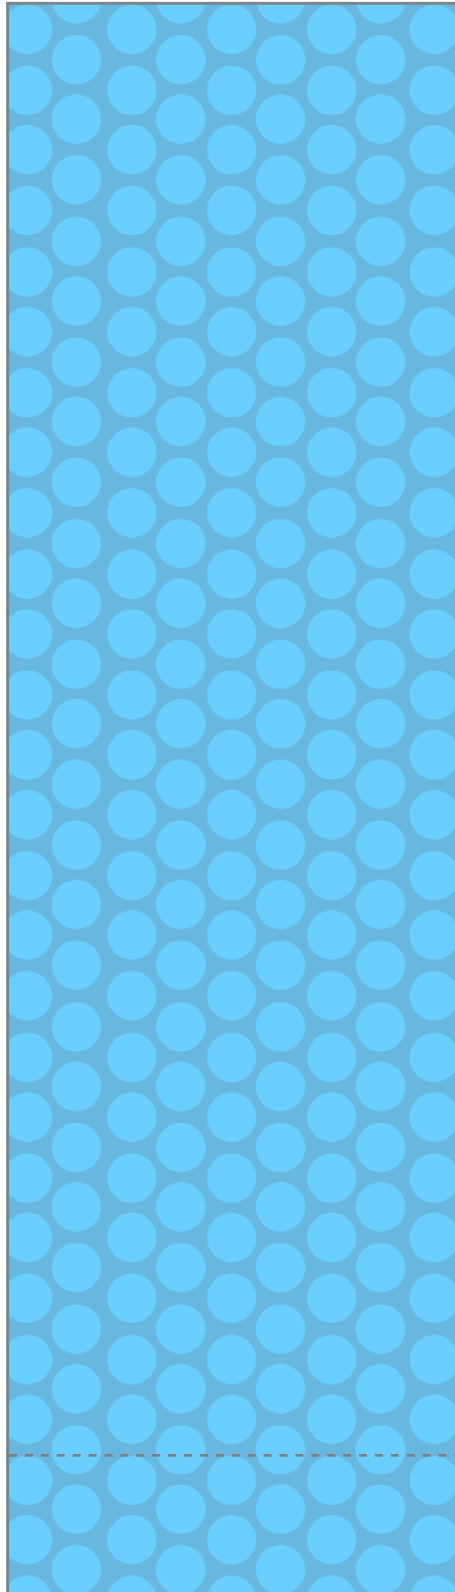

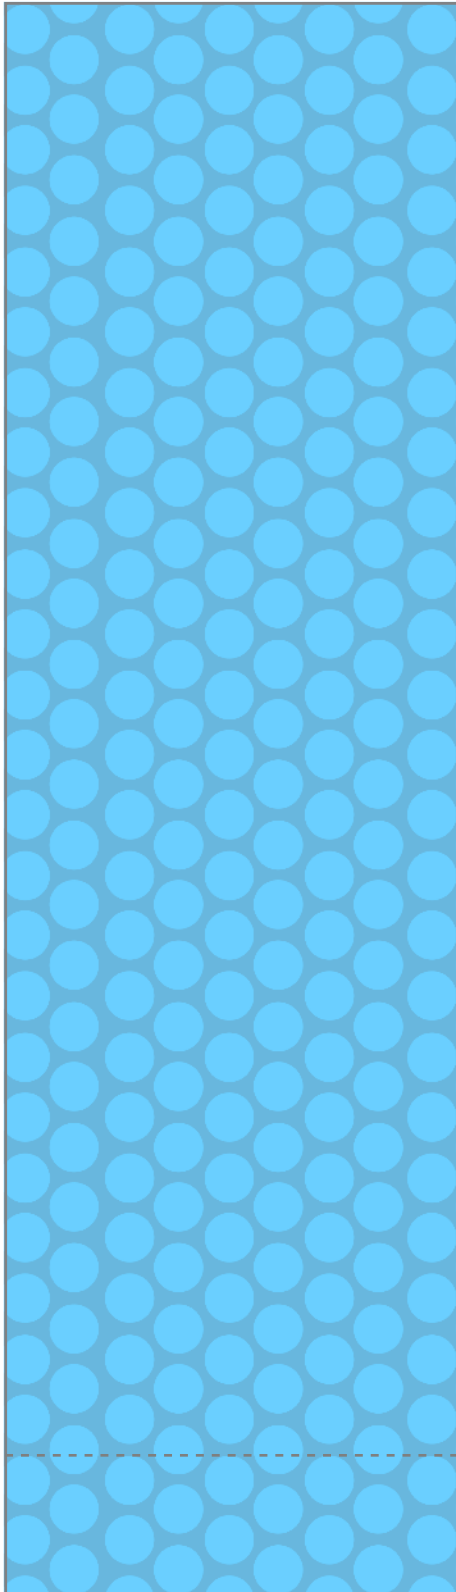

- 9** Continue attaching Bubbles until your Mobile is complete!
